### SHILTON FLY FISHING REELS

*Category: Leisure, Education and Sports*

Shilton Fly Fishing Reels have been designed for fresh and salt water fly fishing environments, giving fly anglers a range of reels designed for targeting all species of fish, whether catching small stream trout to the most powerful blue water game fish.

The frames, spools and components of the Shilton range of fly fishing reels are precision machined from aluminium and stainless steel ensuring corrosion resistance. Materials used for the various clutch systems on Shilton reels consist of natural cork with additives, PTFE polymers and carbon fibres.

**Adjudicators' comment:**

"This is an excellent range of products. The reels are pleasing to the touch and the prices are highly competitive."

**Company:** Shilton Engineering S.A.
